

SUMMARY

I am an **Artificial Intelligence and Data Engineering** undergraduate at Istanbul Technical University with a passion for exploring the transformative potential of deep learning. My academic journey has equipped me with a strong foundation in AI including machine learning, natural language processing, speech processing and data mining. Through hands-on experience with cutting-edge technologies like text to speech models, data mining algorithms, deep learning architectures and machine learning frameworks (PyTorch, Tensorflow) I have developed strong technical expertise in solving real-world challenges. I aim to leverage my skills in AI to drive innovation and create impactful solutions that benefit society.

EDUCATION

İstanbul, Türkiye

Istanbul Technical University

2021 - 2026

BSc in Artificial Intelligence and Data Engineering

PROJECTS

PREDICTIVE ANALYTICS FOR E-COMMERCE PRODUCT REPLENISHMENT

Developed a machine learning model using XGBoost and CatBoost to predict customer repurchase timing in e-commerce, leveraging advanced feature engineering and over 1 million transactional records.

EMOTION REPRESENTATION IN TTS MODELS

Enhanced the emotional expressiveness of text-to-speech systems by integrating emotion embeddings into StyleTTS2, utilizing datasets like RAVDESS for robust emotional modeling.

DATABASE DESIGN AND IMPLEMENTATION

Designed and implemented a database system for a music streaming platform, featuring a RESTful API with Flask-RESTX, JWT-based authentication, and advanced relational modeling.

COURSES TAKEN

I took several courses, and below are some of the important ones that taught me a lot.

- Deep Learning
- Natural Language Processing
- Speech and Audio Processing
- Data Mining
- Cognitive Neuroscience
- Optimization
- Game Theory
- Algorithms I & II
- Database Systems
